PROFILE INFO

Ambitious Computer Science Engineering student with a fervent interest in full-stack web development, data structures, algorithms, and the transformative potential of artificial intelligence.

Adept in C++, JavaScript, and AI-driven tools, with hands-on freelance experience designing responsive websites, mobile applications, and user-centric UI/UX solutions for clients. Passionate about harnessing AI to revolutionize software development.

Committed to applying theoretical knowledge and innovative problem-solving skills to deliver scalable software solutions.

CAREER OBJECTIVE

Seeking a senior software engineering internship to leverage 3+ years of self-directed learning and freelance project experience in developing and optimising full-stack applications. A dynamic and strategic contributor known for leading and applying new ideas to build competitive advantages in software development and visually stunning webpages.
